The Director of Central Intelligence
Washington, D.C. 20505

Intelligence Research and Development Council

IRDC 87-0040
13 October 87

MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM: R. E. Hineman
Chairman

SUBJECT: Council Report on Counternarcotics Initiatives

25X1

1. In response to your tasking of last year, the attached report presents the Council's technical assessment of research and development needs for counternarcotics intelligence. The Chairman, Mr. Donald Latham, asked Mr. William A. Bayse, Assistant Director, Technical Services Division of the Federal Bureau of Investigation to provide for the completion of the report. Mr. Bayse was assisted by a working group composed of members of both the National Foreign Intelligence Program (NFIP) and of the law enforcement community. The report reviews current R&D programs and projected needs in four areas of technology that have been identified as critical in addressing the counternarcotics problem. We wish to bring the major findings to your attention and summarize the resources needed to accomplish the recommended initiatives.

25X1

2. The recommended initiatives emphasize the correction of existing operational and tactical intelligence deficiencies and the meeting of foreseeable counterintelligence threats. The report gives highest priority to initiatives directed against domestic trafficking operations and smuggling through chokepoints, and second priority to interdiction of transshipments and detection and tracking of narcotics prior to entering domestic distribution systems.

25X1

25X1

25X1

TOP SECRET

SUBJECT: Council Report on Counternarcotics Initiatives

25X1

25X1

d. We must expand efforts to use advanced information processing hardware with expert systems software to strengthen the timeliness, relevance, completeness, and accuracy of intelligence support to decisionmakers. Critically needed are: interface systems for processing, storing, and retrieving a wide variety of high-volume information traffic (e.g., detection and tracking sensor inputs, communications surveillance data, fiscal transaction reports); intelligence data fusion capabilities; and multilevel security features for protection sensitive sources and assuring the integrity of intelligence for use as evidence. We recommend that the UCI's Information Handling Committee consider approaches for achieving these objectives to include the development of database integration where possible.

25X1

25X1

TOP SECRET

SUBJECT: Council Report on Counternarcotics Initiatives

25X1

e. During the study, it was determined that a mechanism is needed to facilitate interagency transfers of intelligence and information pertaining to counternarcotics intelligence R&D, and we, therefore, recommend that preliminary discussions be held between the NIO/Narcotics and appropriate law enforcement community officials with counternarcotics responsibilities to ascertain the feasibility of meeting this need.

The Director of Central Intelligence
Washington, D.C. 20505

Intelligence Research and Development Council

29 JUN 1987

IR&DC 87-0028

MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM: Donald C. Latham
Chairman

SUBJECT: Council Report on Counternarcotics Technology Initiatives

25X1

1. In response to your request of last year, the Council is in the process of completing its study on technology initiatives which will recommend certain new starts for application towards countering the narcotics threat. The study has been accomplished by a working group composed of both National Foreign Intelligence Program members and members of the law enforcement community, and has been conducted for the Council by Mr. William A. Bayse of the Federal Bureau of Investigation. Though we are not quite finished, I do want to bring to your attention some of the priority initiatives that we will be submitting and give you a scope of the resource recommendations that will be furnished so that early consideration may be made of these requests in the forthcoming fall budget deliberations.

25X1

2. We have found that drug trafficking and abuse constitute a serious threat to the economic welfare and national security of the United States. Estimated gross revenues from drug trafficking in cocaine, marijuana, and heroin exceeded \$50 billion in 1985. Despite substantial increases in drug law enforcement funding and manpower in recent years, cocaine and heroin consumption have increased. Organized crime elements are moreover adopting increasingly sophisticated techniques for drug trafficking support and pose a growing threat because of increased reliance on violence and corruption. National policy now recognizes the needs for strong intelligence support to Federal drug law enforcement efforts and coordination of intelligence activities of the law enforcement community and Intelligence Community. Intelligence support requirements for law enforcement, however, differ markedly from many of the kinds of requirements that characterize the National Foreign Intelligence Program (NFIP). Similarities are that the information gained is frequently perishable and derived from sensitive sources;

25X1

TOP SECRET

SUBJECT: Council Report on Counternarcotics Technology Initiatives [REDACTED]

25X1

dissimilarities are that the intelligence process must support a very high level of actionability. Information must frequently be made available as evidence in publicly held criminal hearings or trials, and the intelligence collection process must not jeopardize judicial proceedings. [REDACTED]

25X1

3. The assessment of technology options is being conducted by four groups each of which is focusing on a key aspect of counternarcotics intelligence technology, and is being supported by the Drug Enforcement Administration, United States Customs Service, United States Coast Guard, Federal Aviation Administration, Internal Revenue Service, and Immigration and Naturalization Service as well as the Council participants. This effort has identified some high-payoff investments that could provide strong leverage against contraband production activities, drug transshipments and regional and local distribution, operations, and materially assist seizure of fiscal assets of the drug trafficking industry. Pursuit of these initiatives is crucial because the resources available to that industry are sufficient to support a determined counterintelligence effort that can only be defeated through a continuing and focused program of research and development. Lieutenant General Leonard H. Perroots, USAF
Director, Defense Intelligence Agency
Washington, D.C. 20301

Dear General Perroots:

The enclosed report, Research and Development Needs for Counternarcotics Intelligence (U), reviews current R&D programs and projected needs in four areas of technology--communications surveillance, physical surveillance and tracking, chemical detection, and intelligence analysis--that have been identified as critical in addressing the counternarcotics problem. I wish to bring the findings of this report to your attention, and urge you to consider them in structuring your program. National policy recognizes the need for strong intelligence, support to federal drug law-enforcement efforts, and this report delineates one area in which the Intelligence Community can meet this objective.

FROM: Deputy Director of Central Intelligence
SUBJECT: Intelligence Research and Development Council Report
on Counternarcotics Initiatives

I have reviewed the subject report and find it to be a professionally prepared study that will be of great assistance in formulating Intelligence Community counternarcotics investment policy and strategy, and in determining R&D resource-allocation decisions. The working group that prepared the report should be commended for a job well done. Please convey my appreciation to Mr. William A. Bayse, the working group chairman, for his efforts in producing this important study.

MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM: Lt Gen Edward J. Heinz, USAF
Director, Intelligence Community Staff

SUBJECT: Chairman, Intelligence Research and Development Council

25X1

1. Attached is a talking paper for your use in discussing the IR&DC Chairman issue with Deputy Secretary Taft on Friday morning, 11 September. The paper points out the need to have an active, engaged Chairman in place to deal with the Council's busy schedule in the next few months. The time lags that are sure to accompany appointments to fill key OSD vacancies (DUR&E, ASD/C³I) cause us to look outside DoD for someone who can step in now and provide needed guidance without delay.

25X1

2. Also attached is a copy of the DCID establishing the IR&DC, should you wish to review its missions and functions. Finally, a letter appointing Evan Hineman is attached for signature after your conversation with Mr. Taft.

Talking Points--IR&DC Chairman
DDCI Breakfast with Deputy Secretary of Defense

- o Intelligence Research and Development Council (IR&DC) Chairmanship vacant since departure of Don Latham in July.
- o Historically, IR&DC has had close ties to Defense. Chairman, appointed by DCI, has usually been DDR&E (Director of Defense Research and Engineering--Mal Currie) or USDRE (Dick DeLauer, Don Hicks).
- o Goal has been to get better coupling between Defense and Intelligence R&D interests and take advantage of overlaps in R&D community. Focus, though, is on intelligence applications.
- o Do not want to leave a leadership gap as Council will be particularly busy in next few months:
 - About to publish extensive studies on technologies relevant to (1) counternarcotics and (2) deep space collection.
 - New studies are just getting under way and need direction and guidance: parallel processing; optical computing; advanced polygraphy; remote spectroscopy; technology and the analyst.
- o Important to have a Chairman in place soon who is up-to-speed and familiar with Council.
- o Vacancies and confirmation lags in key DoD R&D and Intelligence positions (DDR&E, ASD/C³I) will work against us--stretching out period before active DoD Chairman could be in place.
- o As best solution, intend to appoint Evan Hineman, CIA/DDS&T, as Chairman to keep Council going. Evan a long-time IR&DC hand, has respect of Council members.
- o Anticipate we will probably revisit this topic when DoD appointment and confirmation proceedings are completed and new team on board.

CONFIDENTIAL

B

DIRECTOR OF CENTRAL INTELLIGENCE DIRECTIVE ¹

Intelligence Research and Development Council

(Effective 11 March 1982)

Pursuant to the provisions of Section 102, the National Security Act of 1947, and Executive Order 12333, the Intelligence Research and Development Council (IR&DC) is hereby established.

1. Mission

The Council shall advise the Director of Central Intelligence on research and development strategy and technologies that will best contribute to the attainment of national intelligence objectives. To this end the Council shall explore new directions and techniques in both the hard and soft sciences which hold promise of intelligence applications and identify those it recommends for program resource support.

2. Functions

Under the general guidance of the Deputy Director of Central Intelligence, the Council will:

- a. review national intelligence research and development programs and advise the Director of Central Intelligence regarding their effectiveness in satisfying intelligence goals and objectives;
- b. identify those technology areas in both the hard and soft sciences where intelligence needs are unique and for which intelligence program support is required for development;
- c. review the rationale and perspective for proposed intelligence research and development in the context of present and emerging technology and advise the Director of Central Intelligence on research and development options; and
- d. establish and maintain appropriate means of continuing inter-program communications of technical results, concepts, and plans in critical technologies, including analytic methodologies.

3. Composition and Organization

- a. The Council Chairman will be appointed by the Director of Central Intelligence.
- b. Membership of the Council will consist of senior research and development members of the National Foreign Intelligence Community and of the Department of Defense.
- c. With the approval of the DCI, the Council Chairman may invite other representatives of relevant U.S. Government entities with national security interests to participate as appropriate.
- d. Subcommittees, ad hoc committees, panels, and working groups may be formed at the discretion of the Chairman.
- e. The Council will be supported by an Executive Secretariat provided by the Director, Intelligence Community Staff.

¹ This directive supersedes DCID 1/12, effective 18 April 1978.

William J. Casey
Director of Central Intelligence
